

HLOW Early Careers Mentoring Programme

Are you early in your career as a GP in Hampshire or the Isle of Wight? Would you be interested in accessing free mentoring sessions with an experienced local GP?

Hampshire & Isle of Wight ICS and HEE Wessex Primary Care Training Hub are pleased to offer a new mentoring programme for early career (post-CCT) GPs.

This FREE programme provides one hour per month of mentoring with an experienced GP from outside your practice.

This is your opportunity to think about your current role and your future career, to help you find the right track to achieve your goals, to work out what those goals might be, or for any other discussions you might have helpful with an experienced colleague who is independent of your day-to-day work.

The aim of the scheme is to support early career GPs to achieve their potential and develop a career that is sustainable and enjoyable.

Applications are accepted on a rolling basis.

Please note that this mentoring already forms part of the New to Practice Fellowship Programme – therefore NTP Fellows do not need to apply separately. Unlike the fellowships, however, this mentoring programme is open to ANY Hampshire & Isle of Wight GP, including locums.
